

Cartographer® v. 3.0 Installation

System Requirements:

1. Pentium 500mhz microprocessor or higher.
2. Microsoft Windows 95/98/2000/ME/XP
3. Microsoft Internet Explorer v6.0 or higher (Included on installation CD).
4. 64 MB RAM for installation.
5. CD-ROM for installation.
6. SVGA video with 800x600 resolution or higher.
7. Microsoft compatible mouse.

Installation Instructions:

Insert CD into CD drive. The installation program will start automatically. Follow the install wizard prompts.

NOTE: It is strongly suggested that the software is installed into the default directories.

Note: If you have installed an earlier version of Cartographer v3.0 (3.0.210 or below) you **MUST UNINSTALL** prior to installing this version of the software. Any maps and dictionaries that you have created will be retained.

Start Up:

Click Start -> InterProse -> Cartographer.

Start the program in the normal fashion. You will then be prompted for registration information.

Registration:

If you are evaluating **Cartographer** choose the version you want to evaluate.

To register **Cartographer**, choose the Register Cartographer radio button.
